## Extreme Screen Security Sliding Door

International Window is proud to introduce our new Extreme Screen, a blend of added security and comfort. Our Extreme screen is produced utilizing high quality marine grade, high tensile, 316 marine grade mesh with a black powder coat overlay which blocks out 60% of the sun's harmful UV rays.

Studies show that a patio slider is one of the prime targets for home break-ins. Security screens will deter and greatly reduce the ability of trespassers from entering your home.

Our security screen will add a level of safety and comfort to you and those that you care about.

Besides adding a level of security, the Extreme Screen is also a barrier against your active pets. No more torn screens from pets, these screens are pet-proof.

In addition to the security and safety from unwanted intruders, the Extreme Screen will add marketability to your home in a highly competitive real estate market with it's added security, energy efficiency and aesthetics.

# Ensures Protection Against Pet Damage with Exceptional Durability and Resistance.

## **Certified 316 Marine Grade High-Tensile Stainless Steel Black Powder Coated Security Mesh**

**Corrosion Resistance:** Our 316-grade stainless steel offers exceptional corrosion resistance.

**Pet-Proof Durability:** Our marine-grade material withstands pet impacts.

**Longevity and Durability:** Our Extreme Screen Door is built to last. Unlike traditional screens, it's corrosion-resistant, weatherproof, and remains strong over time.

**Black Powder Coating:** The black powder coating provides an extra layer of rust and scratch protection.

**Advanced UV Protection:** Our mesh shields against harmful UV rays, filtering out up to 60% of damaging rays to protect furniture, flooring, and decor from fading.

## **Commercial Grade Tamper-Resistant Latch & Lock**

**Unyielding Protection for High-Traffic Areas:** Our meticulously engineered lock is purpose-built to endure rigorous daily use and resist tampering attempts.

## **4" Heavy-duty Extruded Aluminum Frame (Grade 6063-T6)**

**Sturdy Construction for Added Strength:** Our meticulously crafted 4-inch frame, constructed from 6063-T6 grade extruded aluminum, guarantees exceptional durability. Whether for heavy-duty residential entrances or commercial spaces, it reliably reinforces security. Additionally, our corrosion-resistant aluminum frames withstand wear, environmental factors, and challenging climates, maintaining their structural integrity over time. You can trust in the robustness of this construction for enhanced strength.

## **Stainless Steel Rollers for Smooth Operation**

Our high-quality stainless steel rollers ensure effortless movement and quiet operation. Designed for durability and precision, they glide smoothly along tracks, providing reliable performance for the Extreme Screen Security Sliding Door.

## **Color Options**

We offer two standard finishes: Bronze Anodized and White Paint. We are proud to provide these colors as standard options to minimize lead times.
